1966-AL

SARDINIA (Pollutidarean Zone of Occupation) Major de Braviti, highest ranking Italian Officer surviving the Pollutidarean conquest of this Island, was asked what he thought about the present plight of himself and his men. He replied, "#0 che sciagura d'essere senza coglioni!?",

POLLUTIDAR-His inferial Majesty Honj the Horny, Emperoar of Pollutidar and hereditary Cid of the Koarsars, announced the approach of Victory in the long war with the inhabitants of the Outer Crust. "More tahn 3,000 sleeps ago," he told the metting of the Representative diet of Pollutidar, "these noisy inhabitants of the Outer Crust began a war. This means that the racket has been making it difficult for us on the Inner Crust to get any sleep. This is a serious matter in Pollutidar, where our only way of measuring the passage of time is bt sleep. After much fighting, and several Pollutidarean invasions of the Outer Crust, victory seems closer. Two of the noisy surface nations have already been silenced, and a third, Russia is on the point of collapse. Large Pollutidarean armies are operating in Siberia, having invaded the Outer Crust through the North Polar opening.

"In the past thousand sleeps, the Mammoth Men Cavalry has invaded Siberia, restocked its cavalry from mammoths there, and occupied Yakutsk. Seven Thousand Horibs mounted on pure-bred Gorobors have occupied Kazakhstan and report that ~~by~~ the inhabitants are "conquered, subdued, and tender". A Xexot Military colony has been founded in the Urals, and those Mountains now echo to the strains of that fine old song, "Deep in the heart of Xexos". A wing of Mahars has swooped down on Perm, and the eminent Mahar scientist Dig-itt-upp claims that forms related to Mahars have been found in the strata to which Perm gives its name. A herd of Ganaks has gored and butted all opposition out of Central Asia, and is now grazing those plains. The last Russian Army is besieged in Moscow, where it is surrounded by a ravenous horde of Azerians, horbibs, Coriples, Mahars, and other anthropophagous Pollutidarean races". This prediction of imminent victory did not find echoes all over Pollutidar. There is a rumor that the Horib chieftain sss-Ss: S will withdraw his forces from the siege of Moscow. "That Russian food always repeats on me," he is said to have remarked. And the subtropical climate of Pollutidar is poor training for the Pollutidarean armies now operating in Siberia.

My thanks to John Boardman for the many pleasant press releases from the Inn er Crust Nation of Pollutidar.
